Course Overview

This one-day course, sponsored by Nursing Professional Development Shared Governance Council, is offered to all disciplines that care for children at the end of life. The course will describe the philosophies, principles, and practices of palliative care that can be integrated across different settings to influence quality pediatric end-of-life. Information will also be provided regarding the role of healthcare providers and families in providing palliative care for children.

Course Objectives

At the completion of this course, participants will be able to:

- Identify communication strategies in palliative care
- Describe approaches for pain and symptom management
- Discuss ethical issues that may arise in end-of-life care
- State potential issues in palliative care for patients of different cultures or religions
- Verbalize strategies for resilience as a caregiver
