

Some buildings  
are just buildings.

Others have a soul.

The Melinda French Gates Ambulatory Care Building continues a 100-year tradition of caring and compassion. This new facility at Children's Hospital offers easy access to the finest pediatric outpatient care. It provides a comforting environment for children and their families. It's home to more than 30 specialty clinics for advanced medical treatment. But mostly, it's a testament to the generosity of a caring community.

**Children's**  
Hospital & Regional Medical Center

In 1907, the community's energy and optimism helped to build Children's Hospital. Today that tradition continues thanks in part to the Bill & Melinda Gates Foundation.
