

Autism 101

Seattle Children's Quarterly Series

Attention to all parents, families, friends, and professionals touched by autism.

Please join us for Autism 101, a free 90-minute lecture that is offered quarterly and is designed to provide information and support to parents and families of children recently diagnosed with an autism spectrum disorder (ASD). Lecturers provide up-to-date and evidence-based information regarding the core deficits of ASD, the variability and presentation of behaviors associated with autism, prevalence and etiology, treatments available, and resources for families. A portion of each session is dedicated to answering questions from the participants.

Classes are held at Seattle Children's Hospital from 7 to 8:30p.m. Lectures are now available to be viewed live using a PC or mobile device from home, school or other centers. For more information and to sign up to view from home, please visit our website:
