

GRAB YOUR GONADS!

1 MAKE A DATE WITH YOUR TESTICLES

examine your scrotum monthly.

2 KNOW WHEN TO HOLD 'EM

check your family jewels after showering, when the sac is soft and relaxed.

3 CHECK YOUR BALLS!

using both hands, gently roll the testicles between your fingers.

notice the size, shape and feel of your balls. normal testicles will feel soft and move freely inside the scrotum.

locate the epididymis, a coiled tube found atop and behind the testis. check for lumps under the skin of the scrotum.

NUTTY NUGGET

testicles move around on their own with help from a muscle called the cremaster.

NUTTY NUGGET

octopus gonads are stored inside its head. talk about sex on the brain.

4 TALK TO YOUR DOC

any lumps or swelling should be reported to your doctor ASAP. other testicular cancer warnings include a dull ache in the abdomen or groin, or blood in your semen.

NUTTY NUGGET

according to our unscientific poll, 45% of men touch their testicles six or more times a day!

this self-exam should not replace the examination and advice of a trained doctor.

DON'T LET CANCER MESS WITH YOUR TESTS
