Seattle Children’s bills a facility charge for hospital-based clinic visits, including Urgent Care, and a telehealth administration fee for telemedicine visits. Here are some details about the charges.

What is a facility charge?
A facility charge includes hospital expenses for a clinic visit that are separate from the cost of the medical provider. You will receive a separate charge from your medical provider for their services. The facility charge includes costs for running the “facility” like supplies, equipment, exam rooms and other Seattle Children’s hospital staff.

What is a hospital-based clinic?
Most of Children’s clinics are hospital-based clinics because they are licensed as outpatient departments of the hospital. Urgent Care is a clinic and also is licensed this way.

There are a few Seattle Children’s clinics that are not licensed this way and will not bill a facility charge. To see an updated list, visit seattlechildrens.org/payingresources.

Why does Children’s bill facility charges for clinic visits and Urgent Care?
• Our hospital-based clinics are licensed as outpatient departments of the hospital. We bill facility charges for all other hospital departments, so we bill clinic and Urgent Care visits the same way.
• This is a standard practice for most other hospital-based clinics.

Why does Children’s bill an administration fee for telehealth visits?
A telehealth administration fee includes expenses for a telemedicine visit that are separate from the cost of the medical provider. Although the visit is online, the provider is still located at one of our Children’s facilities and requires equipment and other hospital staff to provide care via telehealth.

How will this charge affect me?
• If the patient has Medicaid, Apple Health or Seattle Children’s financial assistance: These programs cover the full facility charge. So, you will not have a balance to pay for the charge.
• If the patient has commercial insurance: Some insurance plans apply different benefits to facility charges than to other charges. This can change how much you owe. For example, you may be responsible for a percentage of the charge in addition to your deductible and co-pay. Contact your insurance company to find out what your deductible and coinsurance amount may be for hospital-based clinic facility charges.

How much will the facility charges from Children’s cost?
The facility charge for a hospital-based clinic visit depends on the type of visit your child has.

Here are the main charge levels (effective Oct. 1, 2021):
