Tracheostomy Care Notebook

Introduction to Your Trach Care Notebook

Dear Parent/Caregiver:

This is a tool to help you organize your child's health information. Use this care notebook in a way that works best for you to keep track of your child's care providers, discharge coordination, and follow-up care. You will get a lot of reports and paperwork from your healthcare team. A care notebook helps you organize the most important information in a central place. It also makes it easier for you to find and share key information with others who are part of your child's care team. We have labeled tabs within the binder, but feel free to change them, or add tabs that work better for you. Please ask for assistance so it works for you!

Tracheostomy Care Notebook

Contents
