

Portable Medical Summary

This portable medical summary is for young adults with special healthcare needs. Use it to share important information about your condition when meeting a new provider or transferring your care. Prepare for these situations by filling in the parts of this form that apply to you and your own healthcare needs.

Ask your current providers and family members to help you. Include the key information that your future providers will need to provide you with the best and safest care.

This is not a complete record of your healthcare. It is intended to give a provider a quick look at the most important things they should know about you.

Tips for use:

- Use the last page to add additional information.
- Make a copy of your insurance card and attach it to this sheet.
- Review and update this form once a year, or when a life change occurs (for example, a medical event or move).
- Learn where and how to get your past medical records.
- Share it with your emergency contacts.
