At Your Fingertips!
Grab your phone and aim the camera at the QR code at left to find over 30 Seattle Children’s algorithms and other go-to clinical resources.

These resources were created by Seattle Children's specialists with input from community pediatricians, to help you:
• Manage common (and uncommon) conditions
• Know when to refer to a specialist

These algorithms and other clinical resources can help PCPs keep patients in their medical home longer, kids and families get great care sooner, and Seattle Children’s improve access for kids who need us the most. Win, win, win. Thank you!
