Supporting Babies, Supporting Families: Understanding and Supporting Developmental Outcomes for Infants Born with Neonatal Abstinence Syndrome

Presented by: Emily Myers, MD
Thursday, November 4, 2021 I 1 pm - 2 pm PST via Webex

Program Objectives – The learner will be able to:

- Review the neurophysiological impacts of opiate use on maternal and fetal brains
- Identify challenges experienced by children with neonatal abstinence syndrome which can affect developmental outcome
- Recognize the developmental challenges that can be experienced by children with neonatal abstinence syndrome
- Describe long-term outpatient resources to support children and families, to optimize developmental outcomes

Emily Myers, MD is a Developmental and Behavioral Pediatrician who has been practicing at the University of Washington and Seattle Children’s Hospital for 8 years. She attended the medical school at the University of Washington, completed pediatric residency at the University of Chicago, and finished her training with her subspecialty training in Developmental and Behavioral Pediatrics at the University of Washington and Seattle Children's Hospital. Dr. Myers is the medical director of the neonatal developmental follow up program at the University of Washington Medical Center and specializes in supporting infants and families who experienced care in the NICU, and who are at higher risk of developmental challenges.
