### What to watch for in your baby’s hearing…

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Activities</th>
</tr>
</thead>
</table>
| Birth to three months… | • Startles to sudden loud noises  
• Stirs, wakes up, or cries to loud sounds  
• Soothes or calms to your voice  
• Makes cooing sounds |
| Three to six months… | • Begins to turn eyes or head to sounds  
• Stops crying when spoken to  
• Awakens easily to sounds  
• Begins making vowel sounds such as “ah” and “ou” |
| Six to nine months… | • Looks for family members when named  
• Turns head towards sounds  
• Will respond to own name  
• Responds to simple requests with gestures  
• Begins babbling, such as “baba” and “mamama”  
• Uses voice to get your attention |
| Nine to twelve months… | • Understands “No”, “Bye bye”  
• Responds to soft sounds  
• Looks at pictures when named  
• Repeats simple sounds that you make  
• Uses voice when playing alone |
