Pediatric Bioethics Fellowship Program

The Treuman Katz Center for Pediatric Bioethics is the first in the country to focus on pediatric issues and serves as a national resource for addressing the complex bioethics issues affecting families, healthcare institutions and society.

The goal of the fellowship is to prepare clinicians for academic careers with an emphasis on scholarship in pediatric bioethics. The bioethics fellowship may be done in conjunction with subspecialty fellow training. Fellowship program activities include:

Scholarly Activities: Mentored research projects and presentations at professional meetings.

Educational Activities: Weekly seminars, visiting professor lectures and an annual pediatric bioethics conference. Seminars and lectures through the University of Washington Department of Bioethics and Humanities and the School of Public Health.

Consultation Activities: Seattle Children's Hospital Ethics Committee and clinical and research ethics consultation services.

Teaching Activities: Lectures and case-based group discussions for medical students and house staff.

Clinical Activities: Patient care opportunities on inpatient units or ambulatory care clinics at Seattle Children's Hospital.
