

Meredith Ringel Morris, PhD

Meredith Ringel Morris is a computer scientist conducting research in the area of human-computer interaction, social computing, and accessible technologies. Her current research agenda aims to understand the tech-related challenges and needs of people with disabilities, improve the accessibility of technology with novel interfaces, interactions, and algorithms, and invent novel technologies that enhance quality of life and extend the capabilities of people with disabilities.

Dr. Morris is a Senior Researcher at Microsoft Research, and an Affiliate Associate Professor of Computer Science and Engineering at the University of Washington. She received a Ph.D. in computer science from Stanford University, an M.S. in computer science from Stanford University, and a Sc.B. in computer science from Brown University. More information about Dr. Morris, including links to all of her publications, is available at <http://research.microsoft.com/~merrie>.
