Superb clinical experience and clinical education with graduated responsibility

Opportunities to enhance your teaching skills as part of the emergency department (ED) team, with bedside teaching and small to large group didactics

Advance your academic career through research, publishing, and presentation opportunities

Classes and Masters of Public Health (MPH) degree available at the University of Washington, School of Public Health

**ADVANTAGES OF THE PROGRAM**

- Our faculty includes recognized leaders in emergency medicine. Current research involves simulation, foreign bodies, sedation, diarrhea, quality improvement, transport, cardiac arrest, and ultrasound.
- Clinical research is aimed at improving the care and treatment of children and can impact local, national, and international health care. Your clinical research project is based on your area of interest and will be held to our high standard of research and publishing.
- Eight months per year are spent in the ED at Seattle Children’s Hospital.
- Five month-long rotations including trauma, adult emergency department work, and pediatric intensive care are required.
- Numerous clinical elective rotations are offered and include such options as child abuse, toxicology, anesthesia, and orthopedics.
- Training sites include Seattle Children’s Hospital, Harborview Medical Center, University of Washington Medical Center, and Madigan Army Medical Center ED.
- Our fellowship program is one of only a few programs nationwide that supports core work toward a MPH degree at one of the top-rated programs in the country.
- Graduates of our program have successful careers in academic and clinical PEM.

**About Seattle Children’s Hospital Emergency Dept.**

Current yearly census is about 40,000 patients.

24-hour emergency care for children ages 21 years and younger.

26 Academic Faculty Physicians board-certified in pediatric emergency medicine.

Rapid access to the full facilities and staff of Children’s Hospital and the University of Washington, including experts in more than 20 pediatric specialties.

Hospital serves the Washington, Alaska, Montana, and Idaho region.

**Seattle Children’s Mission:**

We believe all children have unique needs and should grow up without illness or injury. With the support of the community and through our spirit of inquiry, we will prevent, treat and eliminate pediatric disease.

**About the University of Washington Graduate Program**

Each year, approximately 1,100 residents and fellows conduct their ACGME-residency or fellowship training at UW’s primary training sites.
CURRENT FELLOWS

Mark Lo – 3rd year
Research: Ultrasound

“The PEM faculty here are an exceptional group of physicians and provide excellent teaching, mentorship, and friendship. It’s a fantastic place to work.”

Lila O’Mahony – 2nd year
Research: Medically Complex Children

“The clinical training is superb. We support a region that exposes us to some of the most complex, unique, and medically challenging children. It is a privilege to be a part of the community of physicians that make Seattle Children’s Hospital so special.”

Tausala Coleman - 1st year

“This program provides excellent training in PEM. The faculty are great mentors to guide clinical and research career development. The area served by the hospital provides an amazing breadth and diversity of patients.”

Lori Rutman – 1st year

“This fellowship program really stands out among the top programs as a place that balances excellent clinical training with a strong emphasis on research. Fellows are very well supported here by all levels of faculty and staff. I can’t think of a better place to live and work!”
